Technical Skills

Strong : JavaScript (ES5 /ES6), HTML5, CSS3, Flexbox, RESTful APIs

Experienced: Node.js, MySQL, PostgreSQL, Search Engine Optimization, Mobile Responsive Design, HTTPie, ReactJS

Tools: Git, GitHub, Agile Methodology, Debugging, Figma, Slack, JSON, VS Code, Babel

Applications Developed

Foodies [GitHub](#) | [Live](#)

A mobile and desktop app that queries an API to find recipes for food, based on course type (Main-course, salad, dessert, ...etc), or based on food categories

- Executed AJAX calls to open Edamam's **API** to retrieve data in **JSON**
- Rendered information collected from the **API**, through using **JavaScript** for dynamic **DOM** creation
- Implemented **HTML5**, **CSS3** and **Flexbox** to ensure mobile responsiveness

tripster [GitHub](#)

Developed a full stack application using **React**, allowing users to search for recreational activity by city

- Constructed a form allowing users to input city name and recreational activity
- Created a GET request through **Node.js** for two end points, to render the data to the application users
- Rendered the data to the application's front-end by executing a fetch request
- Completed **localStorage** to allow users to view a single venue
- Allowed users to store their favorite venues by integrating **MySQL**
